

P5 Domain Model Document

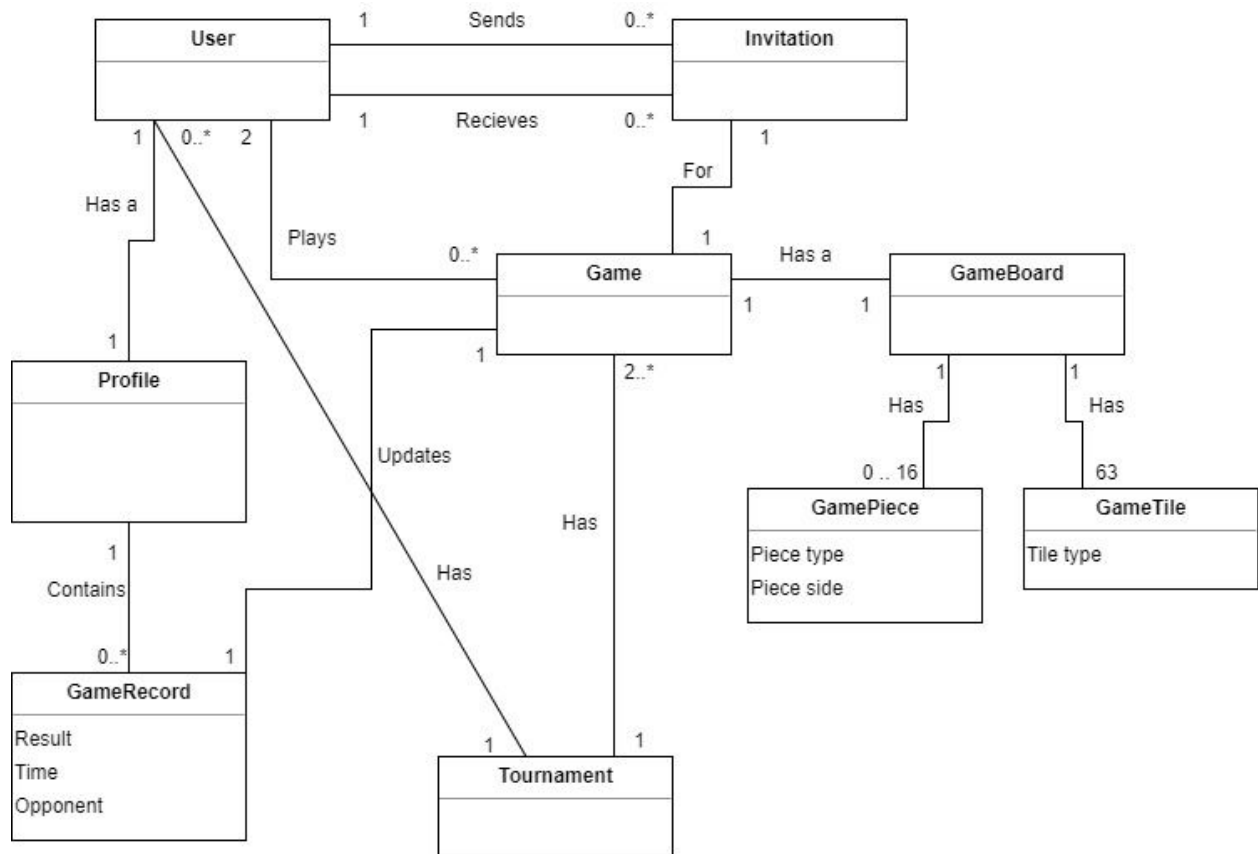

Team: And Yet It Compiles

Members: Laura South, Isacc Mauro, Duck Keun Yang, Brian Larson, Yan Wang

Core Requirements

1. Any person can register to the system. The registration requires an email (which is unique), a password, and a nickname (which is also unique).
2. A registered user can create a new game. The registered user becomes a player of the created game.
3. A registered user can invite another registered user (or set of registered users) to join a created game.
4. A registered user can accept or reject an invitation to join a game. If the user accepts the invitation, she becomes a player of the game.
5. A registered user can be part of different games at the same time.
6. A registered user only has access to the games she is a player of.
7. A player can quit a game at any time.
8. A registered user can unregister from the system.
9. The system must record the history of games played by a user. The record of a game includes the opponent, start date and time, end date and time, and the end result of the game (i.e., win, loss, tie, draw, abandoned, etc.)
10. A registered user has a profile, which consists of her nickname and history of played games. User profiles are only visible to other registered users.
11. A game cannot start until the minimum number of players required for the game have joined.
12. Once a game starts, new players cannot join.
13. The systems must determine which player starts the game according to the rules of the X game. If there are no specific rules, the user who has created the game is the one making the first move.
14. The system determines whose turn it is according to the game rules.
15. A player can only make moves in her active games.
16. A player can only make moves if it is her turn to play.
17. Players can only make allowed moves. Allowed moves are given by the game rules.
18. The system saves the state of active games. Players can play asynchronously but following the turn rules.
19. The system must determine when a game is over. The system must also determine who is the winner and the loser of each game, when there is a tie, or when there is a draw according the game rules.

Domain Model Diagram

Common Associations List

A has B	User - Profile Game - GameBoard GameBoard - GameTile Tournament - Game
A creates B	User - Game User - Tournament
A plays or played B	User - Game User - GameRecord A user playing a game will be able to move GamePiece objects
A contains B	Profile - GameRecord
A sends or receives B	User - Invitation
A is for B	Invitation - Game

A keeps track of B	GameBoard - GamePiece
A is on B	GamePiece - GameTile
A registers or logins with B	User - Authenticator
